

Two-post lift EV adaptors spearhead MAHA UK's participation at ITT Hub

(Wisbech, Cambridgeshire – 2nd May 2023) – MAHA ATS manufacturer-specific EV lifting adaptors will be headlining the workshop equipment supplier's appearance at ITT Hub, with the exhibition dedicated to being the "catalyst for future-focused change" and creating a path for a "smarter, more sustainable global transportation system".

Following its maiden appearance in 2022, MAHA UK will return to the Farnborough International Exhibition and Conference Centre on the 10th and 11th May full of enthusiasm and confidence in inspiring visitors with a product that's intrinsically linked to the exhibition's theme.

The two-post lift EV adaptors, which will be available to order on MAHA UK's stand, aid in the safe removal of vehicle battery cassette blocks. With decarbonisation, net zero and EVs some of the show's key topics, MAHA UK believes these adaptors will impress the audience.

Supporting MAHA UK's stylish stand will also be an array of its workshop equipment – MBT 7250 commercial brake tester, MLT 1000 and MLT 3000 headlight aligners, and a COLUMNLIFT RGA, capable of lifting weights up to 7.5t per column – to illustrate the depth and quality of its portfolio.

A strong team of representatives will be ready to greet delegates, of which 4,000 are expected to attend, with a warm and professional welcome. The experienced trio of UK Sales Manager, **Nick Austin**, Regional Sales Executive, **Luke Fuller**, and Workshop Equipment Specialist, **Louis Tunmore**, will all be in attendance.

MAHA UK Managing Director, Neil Ebbs, said: "Following an intriguing debut at ITT Hub, where we received enquiries and were impressed with the concept of the exhibition, we're excited to return with our EV adaptors.

"We trust the exhibition is the *perfect* place to highlight the benefits of these, as well as point out the all-important safety features when it comes to use of adaptors on two-post lifts."

About MAHA

MAHA is a premium workshop equipment manufacturer, one that is trusted by MOT and ATF centres, as well as maintenance and repair workshops across the UK.

Its portfolio includes brake testers, workshop lifts, headlight aligners and axle play detectors – all vital solutions to help technicians and testers inspect, test and repair all types of vehicles, such as passenger vehicles, LCVs, HGVs, motorcycles, utility and special-purpose vehicles.

Another key part of MAHA UK's business is its array of chassis dynamometers. MAHA has been a long-standing and trusted partner to vehicle performance centres, motorsport teams and racetracks worldwide, thanks to the dynamometers' ability to conduct performance measurements accurately and consistently, as well as support customers with tuning and diagnostic capabilities.
