## MAHA UK applauds Department for Transport's decision to retain existing MOT frequency

- **MAHA UK, a prominent player in the MOT testing and inspection arena, has expressed its support for the Department for Transport's decision to uphold the current frequencies of MOT inspections.**

**Wisbech, 25<sup>th</sup> January 2024.** This judgement reinforces, not only the significance of vehicle integrity and safety, but also the importance of resolving potential vehicle issues promptly and ensuring vehicles meet necessary safety standards.

This message aligns with MAHA UK's *own* mission to provide DVSA-approved workshop equipment that prioritises safety and compliance. Its MBT 2250 roller brake tester, for example, is one of the approved pieces of equipment for MOTs. It is suitable for both class IV and VII vehicles, as well as class I and II.

MAHA UK Managing Director, Neil Ebbs, said: "Extending the MOT frequency could have increased the number of vehicles, in a non-roadworthy condition, on our roads; therefore, we welcome the news that the 3:1:1 will remain unchanged.

"Vehicle and roadworthiness are paramount; therefore, maintaining the current inspection frequency is a positive step towards supporting this."

MAHA UK remains committed to supporting initiatives that enhance the effectiveness and relevance of automotive testing processes.

It also extends its appreciation to the Department for Transport for its diligence in considering various perspectives and maintaining a collaborative approach towards the development of policies that impact the automotive sector.

### MAHA – an overview:

MAHA UK is a premium workshop equipment manufacturer, one that is trusted by MOT and ATF centres, as well as maintenance and repair workshops across the UK.

# PRESS RELEASE

## NEWS

Its portfolio includes brake testers, workshop lifts, headlight aligners and axle play detectors – all vital solutions to help technicians and testers inspect, test and repair all types of vehicles, such as passenger vehicles, LCVs, HGVs, motorcycles, utility and special-purpose vehicles.

Another key part of MAHA UK's business is its array of chassis dynamometers. MAHA has been a long-standing and trusted partner to vehicle performance centres, motorsport teams and racetracks worldwide, thanks to the dynamometers' ability to conduct performance measurements accurately and consistently, as well as support customers with tuning and diagnostic capabilities.
